

Built by people for people.

About Us

On demand private jet charter.

Private aviation is not about aircraft—it's about control. The ability to move on your terms, without delay or sacrifice.

At Avianese, we deliver seamless, precision-led travel for those who treat their time as their greatest asset. We don't just charter jets—we manage movement, mitigate complexity, and operate with speed, clarity, and discretion.

We are a boutique firm by design—not a high-volume brokerage where clients are passed between departments. Our size is intentional, allowing us to be agile, adaptable, and deeply committed to every single client.

Who We Are

Built by Experience. Driven by Precision.

Founded by Nikita, a trained pilot and entrepreneur with experience in both aviation and finance, and David, a private aviation, operations and business strategy expert, Avianese was built from inside the industry.

We've worked for some of the most recognised names in the business—and we chose to leave that world behind in pursuit of a deeper purpose.

What Makes Us Different

BOUTIQUE BY DESIGN

No handovers, no layers. You work directly with us.

POWERED BY PEOPLE

We build relationships, not pipelines. This is a people- first business.

FUTURE-READY

We move with time, embracing innovation where it adds value —but never replacing the human factor..

BUILT ON EXPERIENCE

We've seen what works— and what doesn't.

SOLUTIONS FIRST MINDSET

In our industry, problems happen. We resolve them before they ever reach you.
